Theme 3: School: What school is like: school activities.

Theme 4: Future aspirations, study and work: Using languages beyond the classroom: ambitions, future careers.

Theme 5: International and global dimension: Sports events; music events; campaigns and good causes. Environmental issues:

What will I do in lessons?

Lessons are designed to ensure you develop your communicative skills in the language to enable you to achieve your best possible grade. We put a strong emphasis on developing your spontaneity, complexity and accuracy in the language, as well as your comprehension

abilities, as these are skills needed for both the GCSE examination and for using the language in real-life. You will also be given lots of opportunities to practise the four skills required for the exam, in addition to lots of activities designed to help you acquire, practise and consolidate vocabulary and grammar.

A key aspect of learning a language, regardless of whether you are preparing for an examination or not, is independent work. To this aim, you will complete independent work using interactive online vocabulary resources such as Memrise or Quizlet as well as completing a range of independent home-learning activities to practice and consolidate the skills and knowledge learnt in lessons.

Can I really use languages in the future?

Of course! There are a wide range of job opportunities with languages in a huge range of careers. Just search using the language as a keyword on a recruitment site and you will see a range of jobs in diverse areas as accounting, finance, science, technology, law, marketing and sales. In fact, whatever career you are planning on, knowledge of a language will be a huge asset!

Should I choose two languages?

Woodbridge High School is one of the very few state schools where you can do two languages at GCSE. This is very valuable when applying to competitive universities & looks very good on your CV. Being able to speak two languages will be a huge benefit to a wide range of careers!

Will doing two languages be difficult?

No! The more experience you have learning languages, the easier it becomes. So, learning two languages will mean you develop excellent language learning skills. Furthermore, the two languages you will study are very different (e.g. French/Spanish & German/Russian), meaning you will not get confused easily.
