Introduction

Dear Student,

Please find enclosed a reading list for each of your A Level subjects. Experience tells us that wider reading can make all the difference in enabling students to access the higher grades at A Level. We would encourage you to ensure that you do as much reading as possible to support what you cover in lessons.

Please do not hesitate to contact your teacher in the first instance should you need any further advice.

Jeremy Clifton
Deputy Headteacher
jclifton@woodbridgehigh.co.uk

Woodbridge High School A Level Reading List

Art

Books / Newspapers

As a practical and visual subject the best thing students can do is to regularly visit galleries and exhibitions. However, there are some really good books, websites and magazines which students can read to keep abreast of the contemporary Art world.

Galleries:

- Tate Modern
- Tate Britain
- The Royal Academy
- The Saatchi Gallery
- The Hayward Gallery
- The Serpentine Gallery
- The National Portrait Gallery
- Whitechapel Gallery
- The Barbican Centre

Books:

- Contemporary Art: A very short introduction – Julian Stallabrass
- Modern Art: A very short introduction – Julian Stallabrass
- Art History: A very short introduction – Julian Stallabrass
- Why your five year old could not have done that: Modern Art explained – Susie Hodge

GCSE / A level magazines: Order online

- <https://www.bbc.co.uk/news>

Woodbridge High School A Level Reading List

Biology

Books / Newspapers

It is a good idea to supplement your notes by referencing a second text book alongside the one provided by the school, the following have been found to be useful by past A-level students;

Salters/Nuffield AS/A Level Biology

Understanding Biology for Advanced Level by Glen & Susan Toole

Biological Science 1 & 2 by D Taylor & N Green

A Dictionary of Biology by Robert Hine

To widen your interest in Biology try some of these!

The Seven Daughters of Eve – Bryan Sykes (A history of our mitochondrial migration from Africa).

The Selfish Gene – Richard Dawkins (Evolution & Natural Selection)

Genome – Matt Ridley

Bad Science – Ben Goldacre (How the media misrepresents Scientific & Medical research)

Journals and Newspapers

New Scientist

Nature

The Guardian

The Times

The Independent

Written by Robert C. Martin

Woodbridge High School A Level Reading List

Drama & Theatre Studies

Books / Newspapers

It is essential to your study that you actively read play texts and visit the theatre. The first list of texts is those that will be used throughout your course of study. The second list is texts that may be referred to and will enhance your knowledge.

Antigone- Sophocles (Don Taylor translation)
Doctor Faustus- Christopher Marlowe
Love & Information- Caryl Churchill
Machinal- Sophie Treadwell
The Curious Incident of the Dog in the Night Time- Mark Haddon & Simon Stephens
Saved- Edward Bond
A Doll's House- Henrik Ibsen
Shakespeare: The Complete Works- William Shakespeare (Various)

Artaud's Theatre of Cruelty- A. Bermel
Artaud - The Theatre and it's Double
The Empty Space- Peter Brook
Theatre in Practice A Student's Handbook- Nick O'Brien, Annie Sutton
Stanislavski in Practice- Nick O'Brien
The Complete Brecht Tool Kit- Stephen Unwin
The Theatre of Bertolt Brecht- J.Willett
The Complete Stanislavsky Tool Kit- Bella Merlin
Stanislavski: An Introduction- J. Benedetti
Respect for Acting: Uta Hagen
A Dream of Passion- Lee Strasberg
Laban For All- Jean Newlove & John Dalby
The Frantic Assembly Book of Devising Theatre (Second Edition)- Scott Graham & Steven Hoggett
The Directors Craft: A Handbook for the Theatre- Katie Mitchell
Actions: The Actors' Thesaurus- Marina Caldarone & Maggie Lloyd-Williams
Accidental Death of an Anarchist-Dario Fo
Racing Demon- David Hare
Chimerica- Lucy Kirkwood

One of the leading German magazines for music criticism and arts coverage. You'll find branch-specific terminology here and expand your knowledge of German artists and bands – a worthy goal, since filling your music library with German songs can be one of the best ways to master the language.

<http://www.theeuropean.de/>

The European is a political debate magazine dedicated to presenting a broad spectrum of arguments and perspectives. Es gibt immer zwei Seiten (there are always two sides) to every issue, and generally more than two. Diving into different worldviews is a wonderful way to test your own ideas and expand your mind. Contributing authors come from diverse backgrounds in journalism, politics, science and industry. The niveau of analysis is elevated and the issues complex – you may need to keep a dictionary at hand

Books / Newspapers

How to Think like a Mathematician Kevin Houston (CUP, 2009)

This sounds like the sort of book that elderly people think that young people should read. However, there is lots of good mathematics in it (including many interesting exercises) as well as lots of good advice. How can you resist a book the first words of which (relating to the need for accurate expression) are: Question: How many months have 28 days? Mathematician's answer: All of them.

The MATH BOOK Clifford A Pickover (Sterling, 2009)

The subtitle is 'From Pythagoras to the 57th Dimension, 250 Milestones in the History of Mathematics'. Each left hand page has a largely non-mathematical description of one of the great results in mathematics and each right hand page has a relevant illustration. There is just enough mathematical detail to allow you to understand the result and pursue it (if you fancy it), via google. The book is beautifully produced. The illustration for the page on Russell and Whitehead's Principia Mathematica, said here to be the 23rd most important non-fiction book of the 20th century, is the proposition occurring several hundred pages into the book, that $1 + 1 = 2$.

Mathematics: a very short introduction Timothy Gowers (CUP, 2002)

Gowers is a Fields Medalist (the Fields medal is the mathematical equivalent of the Nobel prize), so it is not at all surprising that what he writes is worth reading. What is surprising is the ease and charm of his writing. He touches lightly many areas of mathematics, some that will be familiar (Pythagoras) and some that may not be (manifolds) and has something illuminating to say about all of them. The book is small and thin: it will fit in your pocket. You should get it.

Solving Mathematical Problems Terence Tao (OUP, 2006)

Tao is another Fields Medalist. He subtitles this little book 'a personal perspective' and there is probably no one better qualified to give a personal perspective on problem solving: at 13, he was the youngest ever (by some margin) gold medal winner in International Mathematical Olympiad. There are easy problems (as well as hard problems) and good insights throughout. The problems are mainly geometric and algebraic, including number theory (no calculus).

The Pleasures of Counting T.W. Korner (CUP, 1996) A brilliant book.

There is something here for anyone interested in mathematics and even the most erudite professional mathematicians will learn something new. Some of the chapters involve very little technical mathematics (the discussion of cholera outbreaks which begins the book, for example) while others require the techniques of a first or second year undergraduate course. However, you can skip through the technical bits and still have an idea what is going on. You will enjoy the account of Braess's paradox (a mathematical demonstration of the result, which we all know to be correct, that building more roads can increase journey times), the explanation of why we should all be called Smith, and the account of the Enigma code-breaking. These are just a few of the topics Korner explains with enviable clarity and humour.

Calculus for the Ambitious T.W. Korner (CUP, 2014)

You can and should supplement your sixth-form calculus with Korner's latest offering. You will find here some familiar ideas seen from unfamiliar angles and almost certainly much that is unfamiliar; multivariable calculus for example (when functions depend on more than one variable). This excerpt from introduction gives you a flavour of the style: When leaving a party, Brahms is reported to have said 'If there is anyone here whom I have not offended tonight, I beg their pardon.' If any logician, historian of mathematics, numerical analyst, physicist, teacher of pedagogy or any other sort of expert picks up this book to see how I have treated their subject, I can only repeat Brahms apology.

What is Mathematics? R. Courant & H. Robbins (OUP, 1996)

A new edition, revised by Ian Stewart, of a classic. It has chapters on numbers (including ∞), logic, cubics, duality, soap-films, etc. The subtitle (An elementary approach to ideas and methods) is rather optimistic: challenging would be a more appropriate adjective, though interesting or instructive would do equally well. Stewart has resisted the temptation to tamper: he has simply updated where appropriate – for example, he discusses the solution to the four-colour problem and the proof of Fermat's Last Theorem.

From Here to Infinity Ian Stewart (OUP, 1996)

This is a revised version of *Problems in Mathematics* (1987); revised of necessity, as the author says, because some of the problems now have solutions – an indication of the speed at which the frontiers of mathematics are receding. Topics discussed include solving the quintic, colouring, knots, infinitesimals, computability and chaos. In the preface, it is guaranteed that the very least you will get from the book is the understanding that mathematical research is not just a matter of inventing new numbers; what you will in fact get is an idea of what real mathematics is.

What's Happening in the Mathematical Sciences B. Cipra (AMS, 1993, '94, '96, '99, '02)

This really excellent series is published by the American Mathematical Society. It contains low(ish)-level discussions, with lots of pictures and photographs, of some of the most important recent discoveries in mathematics. Volumes 1 and 2 cover recent advances in map-colouring, computer proofs, knot theory, travelling salesmen, and much more. Volume 3 (1995–96) has, among other things, articles on Wiles' proof of Fermat's Last Theorem, the investigation of twin primes which led to the discovery that the Pentium chip was flawed, codes depending on large prime numbers and the Enormous Theorem in group theory (the theorem is small but the proof, in condensed form, runs to 5000 pages). Exciting stuff.

Archimedes' Revenge P. Hoffman (Penguin, 1991)

This is not a difficult read, but it covers some very interesting topics: for example, why democracy is mathematically unsound, Turing machines and travelling salesmen. Remarkably, there is no chapter on chaos.

The Mathematical Experience P.J. Davis & R. Hersh (Penguin, 1990)

This gives a tremendous foretaste of the excitement of discovering mathematics. A classic.

Beyond Numeracy J. A. Paulos (Penguin, 1991)

Bite-sized essays on fractals, game-theory, countability, convergence and much more. It is a sequel to his equally entertaining, but less technical, *Numeracy*.

Media Studies

Books / Newspapers

Official text books:

WJEC Eduqas Media Studies for A level Year 1 & AS by Christine Bell and Lucas Johnson. Published by Illuminate Publishing (11th Aug 2017) ISBN: 9781911208105

WJEC Eduqas Media Studies for A level Year 2 & A2 by Christine Bell and Lucas Johnson. Published by Illuminate Publishing (22 Oct 2018) ISBN: 9781911208112

Official revision guide by Illuminate Publishing will be published in Autumn 2019

These books are excellent general texts to support the course:

Key Themes in Media Theory, Dan Laughy, Open University Press: 2007
ISBN: 978-0335218141

The Media Student's Book 5th edition, Gill Branston, Routledge: 2010
ISBN: 978-0415558426

These books can be used for specific research on areas of representation in the media:

Black Looks, hooks, Bell, (Routledge: 2015)

White, Dyer, R, (Routledge: 1997)

The Beauty Myth, Wolf, N, (Vintage: 2015)

The Hip Hop Wars, Rose, T, (Basic Books: 2008)

Films

We will study a film in depth in year 12, and films are a great way to improve your listening skills and cultural awareness. Here are a list of films you could investigate:

Diarios de motocicleta, dir. Walter Salles (2004) ;

El laberinto del fauno, dir. Guillermo del Toro (2006)

La historia oficial, dir. Luis Puenzo (1985) ;

La lengua de las mariposas, dir. José Luis Cuerda (1999) ;

La misma luna, dir. Patricia Riggen (2007) ;

Las 13 rosas, dir. Emilio Martínez-Lázaro (2007)

Machuca, dir. Andrés Wood (2004) ;

Mar adentro, dir. Alejandro Amenábar (2004)

Todo sobre mi madre, dir. Pedro Almodóvar (1999) ; Voces inocentes, dir. Luis Mandoki (2004)
