

# Mobile Phone Options

You will have read in Mr Hogan's newsletter that from September 2026, smartphones will be banned on site for students in Years 7, 8 and 9. You will also know that we have been supporting the [Smartphone Free Childhood](#) initiative; we would encourage parents and carers to have a look at this to explore the benefits of this approach.

We understand that some parents may still wish their children to have a device in order to contact them before or after school. If a device is brought into school, it **must not** have access to the internet or social media.

Below are a few options that parents may wish to consider (there are many others available online). We have also included some tracking options for parents who would like to monitor their child's location (the price of all is correct at time of writing).
